1. Company Overview

NTT is a leading provider of software, Networking and consulting services to clients worldwide. We offer a broad range of service offerings including technology consulting, custom application development. Using a global delivery model that leverages our cost-effective offshore development center located at Riyadh(KSA) we provide high quality solutions on schedule. We build long-term partnerships with our clients, providing value on a sustained basis, leading to mutually beneficial engagements.

NTT is quality-focused company. We continuously strive to attain higher organizational maturity to provide better value to our clients. Our domain skills, technology expertise, and business and processes ensure that we are dependable business partners to our customers. Our management team comprises a judicious mix of technocrats and professionals with specialization in a wide spectrum of industry segments.

We nurture a rich cross-cultural work environment that promotes individual and organizational excellence in everything we do. To provide sophisticated services up the value chain, we have setup Knowledge Management Groups. These high-powered teams stay in tune with the latest developments in industry best practices and technology. Our knowledge backbone leverages the cumulative experience of several client engagements. Optimal automation of internal business processes results in progressively shorter turn-around cycles. Over some years of work, we have developed a range of solutions and gained ample experience in the services we offer: Custom Software Development, E-commerce Solutions Development, E-learning Solutions Development, Web development, Legacy Applications Reconstruction, Project Recovery, Consulting, Quality Assurance.

Our specialists have been providing software development services for multiple clients from KSA, starting from small companies and continuing with very big clients. we have completed different kinds of projects; and we specialize in automation of business processes used by our clients. NTT is a multinational software development company based in the KSA with its branches in USA, UK, UAE, Canada, India and Singapore. We employ highly qualified software development engineers however, as a KSA registered company, we can provide our clients with the Software development framework they require.

Our IT specialists who wanted to overcome the routine and create a company that would act in the market not only for business success but for the sake of Technology itself.

We offer wide range solutions starting from software products, mobile system, workflow and enterprise systems. NTTE competently help its clients to fulfill their business needs including consultation, design, development, testing, implementation, training, and maintenance.

3. Services

3.1 Technology Consulting Services :

NTTE consulting services help clients conceive, plan and execute their business strategies, by aligning them with their information technology initiatives. Our consultants, with a broad mix of industry and technology experience, collaborate with client executives to evolve strategies and solutions most appropriate to them. These strategies and solutions enable our clients to leverage new technologies, while protecting their current technology investments.

www.eazylocation.com

Our skilled consultants help our clients in aggressively accelerating time-to-market and realizing business advantages much ahead of competition. We work with our client to understand their requirements completely. Based on a thorough and careful analysis, we develop the best and the most optimal technology strategy for the client. Our consulting services are an end-to-end offering, incorporating the right technology with industry best practices, to deliver high value business solutions.

3.2 Application Development Services

NTTE has an enviable and consistent record of having completed projects on time and within budget. This consistency has been our hallmark. Best practices from previous projects are systematically captured in our knowledge repositories, without compromising on any confidentiality. These help us in rapidly shortening the turnaround cycles. We closely watch emerging technology and process trends such as rapid application development and component-based software, to provide timely benefits to our clients. One of the challenges that many companies face today is maintaining and enhancing existing systems, while still requiring key technical resources to be available for the development of new systems.

To support our clients in addressing these challenges, we offer the following services.

- Co Development
- End-to-End Development
- Bespoke Development
- Turn Key Solutions
- Product Development

Our experience in application development combined with a tested offshore delivery model aims at

- Cost-effective solution to the clients
- Accelerated maintenance cycle
- Reduces management bandwidth required for technology
- Allows the client to focus on core business

3.3 Application Management Services

In these days of rapid technology changes, companies are facing a compelling need to make their products and services available on newer and more advanced platforms. Existing IT solutions thus needs to be continuously modified and enhanced to support the improved business process.

- Maintenance
- Enhancements
- Migration

Our migration services encompass

- Technology Migration
- Platform Migration
- Language Migration
- User Interface Migration

P.O.BOX- 220089 RIYADH - 11311 TEL: +966-1-4031268

Fax: +966 1 402 6618 Mob: +966-533123214

E-mail: burhanmustak@nttgroups.com

burhanmustak@eazylocation.com

www.eazylocation.com

Our migration tools range from simple code parsers, complex data-schema generators to highly sophisticated build environment generators. These lower the execution costs significantly, while simultaneously reducing cycle times. Our strong re-engineering discipline enables our clients to leverage newer technologies that provide flexibility and faster time-to-market. Our team of business and technology analysts assesses our clients' re-engineering requirements, and provides recommendations on the best and the quickest course to achieve the same. Our skilled and experienced engineering wing collaborates with clients in implementing the recommendations quickly and cost-effectively.

3.4 Website Solutions

The web is rapidly changing the way we conduct our business. It is acting as a catalyst in fueling the economy worldwide. As a result, a whole New World with unlimited opportunities is opening its doors to the business community across the globe. We believe the right step towards this direction would be making use of our experience and expertise to develop web-enabled applications. Also we would pool in all our efforts to understand the web-scene around the company. Our energies will be totally devoted in enabling to extract the best possible solution for enhancing the user needs and wants.

We offer the following Web solutions

a) Domain Name Registration

It is extremely important to have a unique and relevant brand name to your business on the Internet. Your brand name is represented by a domain name, which is a unique address that identifies a computer network, which is connected to the Internet.

Why you should invest in the domain?

Vital part of corporate identity and has important as your logo or Brand name Domain names are scarce and are a rapidly diminishing commodity Distinct identity: There can only be one "www.yourcompany.com" on the Internet. So make sure you register your organization quickly before it is gone for good. The longer you wait the less likely you will be able to get your specialized name.

P.O.BOX- 220089 RIYADH - 11311 TEL: +966-1-4031268

Fax: +966 1 402 6618 Mob: +966-533123214

E-mail: burhanmustak@nttgroups.com

burhanmustak@eazylocation.com

Visit us at : www.nttgroups.com

www.eazylocation.com

Why register with us:

Best prices as we deliberately pass on the cost advantages of bulk booking to our customers. No other hidden costs like setup, administration handling etc. No other conditions apply e.g. the client is free to have separate service provider for hosting. Free administration to handle/own/change the contacts (Admin billing, technical) for the domain as frequently as the client wishes.

b) Hosting Solutions

To enable a seamless information exchange over the web, it is important that the solutions be resident in a reliable server and available at the right time. We provide "quality sever space" ranging from 100 MB to 1 GB at affordable prices. Our motto is to present you an effective, simple and affordable way to make your entry into the Internet with our ability to provide "quality space" on the net.

c) e-Brochure design

It is important to attract customers to your website through interesting and useful information. Attractive web pages act as a vehicle to draw more and more people to your "online address" if they have the right content. We help you to create informative web sites through our quality designs. Our team of creative and talented designers will help you to create an identity in the virtual world.

f) Windows Application Solution

- Client/Server, Distributed and Middle Tier Application.
- Customize ERP.
- Mobile application
- Application for Sales and Purchase.
- Application for HR solution –Persona & Payroll (Employee information, salary record, Commissions, incentives, vacation, loan, end of service etc.,).
- Application for Account Solution (All incoming and outgoing expense).
- Application for Finance solution (Payment information, Due payment, Payment collection, employee salary and all other expenses record for Balance sheet & Trial balance etc).
- Application for Project details (Old project details, ongoing project details, Quotation of project by just giving project code etc.).
- Application for Students Information (History of students with their grade and contact details etc) - **For school.**
- Application for Library and Laboratory (All records of books, scientific equipments and others including purchase etc.).-**For school**
- Application for Patients Information (History of their treatment, disease with contact details...). - **For Hospital/Clinic**
- Application for Assignment Manager (Based on Doctors/Nurse specialization, availability, geographical location etc.,). -**For Hospital/Clinic**
- Application for Work Flow (Doctor/Nurse visit to the patient, the input of treatment, input of the given Form etc.,) -**For Hospital/Clinic**
- Billing Application. -**For Hotel/Mall / Shops etc.**

d) Design philosophy:

We take utmost care in designing a right kind of site for you. We start by collecting the requisite information for building the site. Our creative team helps you in fine-tuning and making the information presentable and interesting. After the content is ready, our designers will put in their effort to give the site a pleasant and aesthetic look. Once the pages are ready they will be optimized and thoroughly tested for best performance. We are always welcome the suggestion of our clients at any stage of the design. We work with a team of copywriters, visualizers, designers and web developers/ programmers to give that extra touch of professionalism to our work.

g) e-Commerce Solutions

e-Commerce is creating ripples in the "virtual World" and is taking the global economy into dizzying heights. With the advent of e-Commerce the term "global village" is becoming a reality. It is high time that any business with keen foresight made its mark in this revolution. We are committed to provide you the best e-solution to have a say over the web. Our forethought has helped us to come out with a range of e-Business tools to accelerate your business in the e-Commerce revolution.

h) Portal Solutions

With the web taking the center stage for all software development activities, it is safely becoming a right media for addressing requirements of the global customers. With "portal" being the current mantra of the web, we intend to utilize our expertise in offering quality solutions in this area. Our IT specialists who wanted to overcome the routine and create a company that would act in the market not only for business success but for the sake of Technology itself.

Our specialists have been providing software development services for multiple clients from KSA, starting from small companies and continuing with very big clients. we have completed different kinds of projects; and we specialize in automation of business processes used by our clients. We employ highly qualified software development engineers however, as a KSA registered company, we can provide our clients with the Software development framework they require. Our IT specialists who wanted to overcome the routine and create a company that would act in the market not only for business success but for the sake of Technology itself.

3.5 Quality Assurance Services

Software testing is one of the most neglected aspects of the development life cycle, even though it is the key element, which determines business success or failure. Our Software Testing and Risk Management service is a formal, structured, methodical and complete solution to any software-testing requirement client personnel to understand and identify potential software risks. After studying and assessing the possible impacts of these risks, we recommend appropriate mitigation procedures to overcome them. Our QA professionals have complete understanding of software architecture, design and development issues and nuances. We work closely with the development teams from the conception phase on, providing invaluable inputs on requirements qualification, completeness and testability. Test strategy is established to address user interface, stress, performance, coverage testing as well as test automation. Based on the outcome of the testing the QA team suggests recommendations that would help improve the quality of the solution.

3.6 Networking

6. Methodology for software solution

In developing our project execution model, we at NTTE adhere to the international standards like CMMI-SW, Rational Unified Process and ISO 9001:2000 to make the project flow easy and transparent for the client. Every project has its 5 stages, which are:

- 6.1. Inception
- 6.2. Requirements Management
- 6.3. Software Solution Development
- 6.4. Product Integration
- 6.5. Quality Assurance

6.1 Inception

This is when the initial requirements collection takes place – our business analysts and software architects will carefully study your requirements to prepare a comprehensive proposal. You don't have to provide us with structured documentation. Just let us know your thoughts and expectations, and our specialists will work on defining all the details by asking you some questions and offering our ideas on your project. The proposal is free for you and has no obligations.

6.2 Requirements Management

At this stage we will clearly describe your requirements in project documentation. Our specialists will prepare a proposal describing the product's performance, technologies, design features, verification requirements, etc. as well as the estimation of workload and cost of the project. The requirements management allows for the activities for obtaining and controlling requirement changes and ensuring that other relevant plans and data are kept current. Requirements management continues all through the project, culminating in the comparison of the product against the requirements.

6.3 Software Solution Development

The software solution development is the greatest stage of the project where most of the programming, coding and testing takes place.

6.4 Product Integration

At the Product Integration stage we define the best possible integration sequence, integrate product components and deliver the product to the client.

6.5 Quality Assurance

Quality Assurance is an essential part of any project, which ensures the top quality of our solutions. This is a complicated process, which takes place at all other stages of the project and includes the following activities:

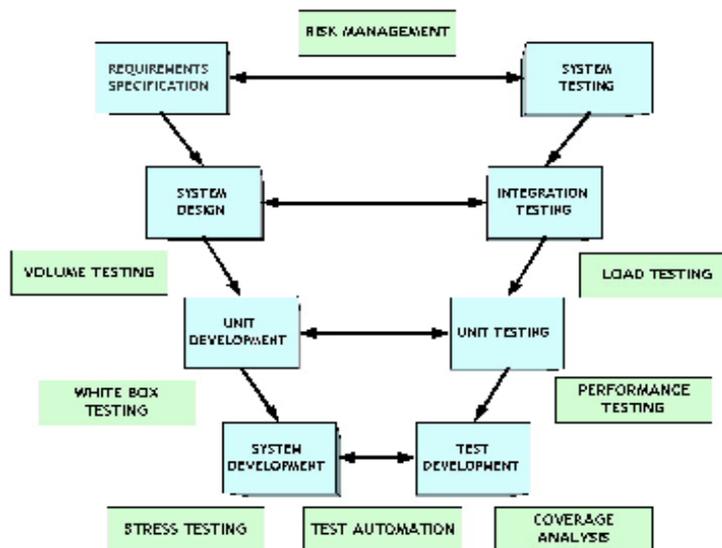

- Strong project management
- Transparent project flow
- Well-defined requirements and structured project documentation
- Deep testing, bug-tracking and fixing

- Process monitoring, product evaluation in regard to the specified requirements and client expectations
- Usability analysis
- Confidentiality and Intellectual Property Protection

7. Quality Assurance Services

Software testing is one of the most neglected aspects of the development life cycle, even though it is the key element, which determines business success or failure. Our Software Testing and Risk Management service is a formal, structured, methodical and complete solution to any software-testing requirement.

Our risk management professionals conduct a series of interviews with key client personnel to understand and identify potential software risks. After studying and assessing the possible impacts of these risks, we recommend appropriate mitigation procedures to overcome them.

8. Defect Free Products And Services

Our established process measurement mechanisms to track and prevent defects at early stages of development of products and services ensure that we deliver software into production with so few defects that users of the software consider it to be defect-free.

9.1 We Bridge The Gap Between Employers And The Job Seekers

Our professional experts values our customers requirements and respect human resources. Our wide network and infrastructure are added to our strength. We are committed and experienced in the field.

9.2 Client Focus
